Instead of going to the theatre — make the theatre come to you

That's better than going out on a stormy night, or not getting good seats, or sitting out a show that is tiresome in parts—it's better no matter how you look at it.

And you can easily do it if you have a Victor. That gives you an all-star performance right in your own home—front seats, and a program of your own making that starts whenever you are ready.

Why not come in today and hear the Victor and find out how you can easily own one? Victors $10 to $100. Victor-Victrolas $15 to $200.

"The Pet of the Paddock" HERE APRIL 7th

Our Sanitary Bulletin

Before the Spanish-American war epidemics of Yellow Fever in Memphis, New Orleans and many of our American cities were of frequent occurrence.

Cuba, Panama and the Philippines were hotbeds for breeding Yellow Fever.

Now a case of Yellow Fever anywhere in the United States would be a marvel, and Yellow Fever in Cuba, Panama or the Philippines is unknown, except by remembrance of the past.

These remarkable changes have been brought about by sanitary disinfecting, preventing the propagation and spread of the germ which causes Yellow Fever.

Other contagious diseases, typhoid fever and tuberculosis, are just as subject to prevention by the use of sanitary disinfectant as Yellow Fever.

Science has demonstrated that all diseases originate from germs; to prevent the germ from propagating is to do away with disease.

Most of our germs reach us through the sewer opening in our homes and business places.

A disinfectant to destroy these germs, if of good quality, will slack, evaporate or lose its potency in an hour, so that it is necessary to distribute a disinfectant every hour or oftener.

This trouble of distributing disinfectant and our liability to forget to put it out has caused disinfectants to be used very little in the past.

All there is to the disinfecting business is the distribution.

At last an automatic machine has been invented which evenly and perfectly distributes the disinfectant into the sewer opening, the home and breeding place of the germ, thereby preventing the propagation of the germ and destroying all disagreeable odor.

The air we breathe purifies our blood if the air is pure.

We can live without food for weeks, we can live without water for days, but we cannot live without air for ten minutes, yet we give less attention to the air we breathe than to any other necessity of our existence.

These automatic disinfectors purify the air in a residence or business house, preventing the origination of tuberculosis.

There has also been invented an almost odorless, non-poisonous, slightly perfumed disinfectant to use in these automatic machines, to replace the old obnoxious disinfectant formerly distributed by hand.

The Majestic Theatre management, having in view the comfort and welfare of its patrons, has equipped this building with Hitchcock's Patented Automatic Ozone Disinfectors.

These Disinfectors should be in every home. The Disinfectors are constructed of aluminum, are of superior workmanship, and rent for 90c a month, including disinfectant used; a discount of 30c per month is given if bill is paid on or before the 12th of each month for the preceding month.

For further information regarding these Disinfectors you are referred to

Ozone Disinfecting Co.
